## Spay/Neuter Certificate

Dear Vet....

I am including this spay/neuter certificate along with the initial puppy health records.

This puppy and has had his/her 1<sup>st</sup> DAP shot. Please refer to the health binder that was included in the puppy pack.

Our mutual client is under a strict spay and neuter contract. We do not perform ESN. We would prefer our puppies not be de-sexed prior to 6 months of age. For this litter our contracts with other breeders allow us to offer a delayed de-sexing until age of 6 months.

Please retain a copy of this in your file for a future date when I would ask that you would please complete this form and email me a copy of the completion of the spay or neutering of this puppy.

Thank you so much. If you should have any questions or concerns you are welcome to contact me via email or on my direct line listed above.
